Colluloid is a composition of fine tisme paper and camphor, treated with themicals by a patented process. A after common impression that it conteins gun-cotton is a mistake, which rises from confounding it with collodion. Celluloid, it is said is entirely non-explosive, and burns only when in direct contact with flame. When crude it looks like transparent gum, and its also is a light yellow-brown. It can be ande as hard as ivory, but is always clastic, and can be moulded into any conceivable form. With equal case it can be colored in any tint desired, the dye running through the entire sub stance, and being therefore ineffaceable. Celluloid has made great inroads on the business of the ivory manufacturers. Its makers assert that in durability it is much superior to ivory, as it sustains hard knocks without injury and is not liscolored by age or use. Great quanti-ties are used for piano and organ keys. Billiard balls are made of celluloid at

durable and equally elastic.

Large amounts are used for combs of every variety, for the backs of brushes and hand mirrors, and for all kinds of toilet articles for which ivory has been employed. Among many other articles in which celluloid takes the place of yory or india rubber, are whip, cane and umbrella handles, every kind of harness ta annings, foot rules, chessmen, and the andles of knives and forks. To freedom of celluloid from sulphur, and the natural flesh color which can be

en: ively substituted for india rubber in the manufacture of dental blanks, or the gums and other attachments of artificial eeth, and is superior for pencil cases, jewelry, etc., where gold meanings are used, as it does not tarnish the meta.. Celluloid can be mottled so as to imitate the finest tortoise-shell, and in this orm it is used for combs, card cases igar cases, match boxes, pocket books, apkin rings, jewelry, and all kinks of ancy articles. Instead of amber it is made into mouth-pieces for pipes, cigar holders and musical instruments, and is used as the material of flutes, flageoreis and drumsticks. For drumheads it is said to be superior to parchment, as it is not affected by moisture in the atmosphere. As a substitute for porcelain, celluloid is used for dolls' heads, which can be hammered on the floor without danger of fracture. Beautiful jewelry is made of it in imitation of the most

laborately carved coral, reproducing all the shades of the genuine article.

One large establishment is employed exclusively in making optical goods, us-ing celluloid in black of tortoise-shell, jet etc., for frames of spectacies, eye glasses und opera glasses. It is also extensively used for shoe tips instead of metal tips having the appearance of patent leather; is also used for insoles. Large quantities of thimbles are made from it, and it is said to be the best material known for emery wheels and knife sharpeners. Another branch of celluloid manufac-

are has been developed which promises to reach enormous proportions. This is the use of celluloid as a substitute for Tobaccos

Tobacc

housekeeper, for she has a strong prefer ence that you use the glass, for various

Ifriend who does her own work, and she has exerted every nerve for your pleasure, after she has washed her china, and her work done up, don't expect her to sit at the piano or organ all the evening and play until she is ready to fall from the stool. And during the day (unless invited by her) don't go into her kitchen and ask a handred questions. There are very few whom very few whom we welcome in our kitchen. Old-fashic and housekeepers seldom do this. Only those who deend upon girls know not the annoyance this terrible intrusion.

Raisins, Foreign and Domestic.

The United States is the greatest raisin consuming country in the world, and uses annually more raisins than the whole of Europe. This market is only supplied from Spain, the raisins known the "Malagas" being considered the best. They come from a comparatively narrow strip of country in the south of Spain, which has hitherto been regarded as surpassing all other regions for raising raisins of that character. The annual ed geeso, lb, 16 @17c.
POTATORS — Eastern_100 lbs, 40@45c; Gree-lev. 100 lbs, 60@70c.
Vigetables — Onions, 100 lbs, 175@2 25; cabbego, 100 lbs, 180@2 00; beets, 100 lbs, 180@2 00; FRUITS — Oranges, Messina, box, 450@500; Valencia, case, 10 00@11 00; lemons, Gaote Messina, 500@550; pears, box, 3 25@350; apples, eastero, bbl, 6 00@650; grapes, Malagas, regular, 7 90@750; bauanas, bunch, 500@88 00; cranberries, B. & B., bbl, 15 400@ Mears — Hams, lb, 16 c. bears the second of this enarcter. The annual vield of Malaga grapes averages 2,250,000 boxes, and last season 2,000,000 were marketed, Of this enormous yield the United States takes fully one-half, on which it pays a duty of 2½ cents per pound. The American raisins are made from a white grape, the "Muscat of Alexandria," to the raising of which the soil and climate of a large portion of California are so well adapted. The vine begins to bear somewhat in the second year, although the full bearing is not developed until it is ve years old, and continues to bear for half a century, and sometimes for sevan-ty-five years. In the cultivation of raisin grapes, American grape-growers have little to learn of Spain, but in the have little to learn of Spain, but in the caping and packing of grapes a lack of experience is still felt. The raisins are not cured by any artificial process, however, but in a comparatively simple manner. The grapes are laid on gravel beds, and are exposed to the sun for ten or twelve days in August or September, when they are ready for packing, having turned from white to brown, and gradually changed to their familiar dark colors. by changed to their familiar dark color of the raisins of commerce. The white sugar which is generally found attached to the raisins sold in the market is entirely a natural product of the grape, and comes on with age—first appearing, as a rale, when the raisins are about two

A STRONG CEMENT.—A coment particularly adapted for attaching the brass-work to bottle necks, but ps, etc., is made by boing three parts resin with one of caustic sods and five of water. The composition is then mixed with half its veight of plaster of Paris. It sets firmly in about three quarters of an hour. BEDFORD & SOUER,

One Hundred Dollars

For a choice lot in Syndicate Hill Addition. This addition joins the he Syndicate lands in south Omaha, and will rapidly build up with com fortable hornes. These lots are beautiful and are near the stock vards and packing houses, and will be occupied as homes by the employes of hese works, and are undoubt-dly the best value for the price of any lots n the market. Several have been sold and the price will soon be alvanced. We have the exclusive agency on this addition. Terms easy.

This is a new addition on Leavenworth street in West Omaha. A ow price has been put on them to start them. \$150 to \$300. On easy erms, The grading and improvements to be made on Leavenworth St., this spring, will, make this very valuable property.

CLARK PLACE.

This is a sub-division of the Megeath property facing Hancom' Park on the south. Good location, near street car, fine view and has a good growth of native timber. This is one of the finest additions in Omaha and will sell rapidly. Price \$300 to \$650. One fourth cash palance on good time. First come, first served. This is a splendid opportunity for persons who intend building for a home.

TUKEY & KEYSOR'S SUB-DIVISION

beautiful piece of ground lying one block south of Gilman West Omaka. The first of these lots will be sold at \$125 to \$150, and are a bargain. A nice sightly location, beautiful place for a home and plendid investment for a rich man or a poor man.

HAWTHORNE

This addition lies between Capitol avenue and Cass street, ten blocks rom the High School, one mile from the postoffice, and is what is known s inside property. The city is built up far beyond this addition and the inest residences in the city are in this locality. The grade on Davenport treet has been established and work commenced, and will be completed as soon as the weather permits. The contract has been let for building large brick school house on Douglas street, three blocks from this addi ion. We predict that these lots will more than double in value before August, as it is the most desirable part of Omaha and would have been ouilt up years ago had it been placed on the market. Prices

\$350 TO \$650

Adjoining lots are being sold at double the price we ask for these.

KIRKWOOD.

We have six lots left in this addition which we offer at a bargain.

some well improved farms in Sarpy county.
